

# NIBC Bank N.V.

## Update

### Key Rating Drivers

**Satisfactory Credit Profile:** NIBC Bank N.V.'s ratings reflect its niche franchise and business model, and an improving risk profile with lower exposure to cyclical sectors that should lead to better and more stable asset quality. The ratings also reflect the bank's satisfactory earnings, solid capital buffer and stable funding and liquidity.

The assigned Viability Rating (VR) is one notch below the 'bbb+' implied VR because the bank's risk profile has a high influence on the rating. Fitch Ratings believes NIBC's remaining exposure to cyclical sectors will be tested in the near term by macroeconomic challenges.

**Growing Retail Activities:** NIBC has steadily expanded its franchise in residential mortgage lending to offset the cyclical nature of its corporate exposure. NIBC has lent to Dutch medium-sized companies and entrepreneurs for several decades. Its corporate offering comprises lending, asset-and-receivable financing, advisory, and co-investment activities, with a focus on profitable niches. NIBC's strength lies in its operational agility and tailored solutions, providing it with adequate pricing power in its niche markets.

**Improving Risk Profile:** NIBC's exposure to cyclical sectors, shipping, oil and gas, and leveraged finance, has significantly decreased in recent years. The bank will be less vulnerable than before as its residential mortgage lending activities cushion any performance swings in its remaining corporate and SME credit exposure.

**Satisfactory Asset Quality:** NIBC has modest levels of impaired assets and its loan portfolio quality has been fairly variable. Risk concentrations remain, especially in sectors such as commercial real estate and shipping (about 115% and 70% of common equity Tier 1 – CET1 – capital, respectively). However, we believe the shift in the bank's loan portfolio will help maintain its impaired loan ratio below 2% in 2023, despite the economic slowdown, higher energy prices, supply-chain disruptions, and higher interest rates.

**Above-Average Profitability:** NIBC's focus on profitable niches, good cost discipline and moderate loan impairment charges has resulted in higher profitability than western European peers. We expect the bank will maintain operating profit above 2% of risk-weighted assets (RWAs) in 2023. This is because growth in business segments such as leasing and mortgage loan origination to third parties at least partly compensate for the loss of revenue from winding down its higher-risk exposure.

**High Capital Ratios:** NIBC's risk-weighted capital and leverage ratios are commensurate with its risk profile and compare well with those of domestic and international peers. The fully loaded CET1 ratio of 17.7% at end-2022 was considerably above its regulatory requirement of 9.2%.

**Stable Funding:** NIBC's funding and liquidity have remained stable despite reliance on price-sensitive online retail savings (about 55% of non-equity funding) and wholesale-funding sources. The bank's conservative liquidity management ensures that upcoming maturities are well covered with high-quality liquid assets.

## Rating Sensitivities

### Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

Fitch believes a downgrade of the VR and IDRs is unlikely in the near term given Fitch's view of satisfactory financial buffers at the current rating. However, a downgrade could be triggered by a combination of the CET1 ratio sustained below 14%, operating profit/RWAs falling and being maintained below 1.5%, and the impaired loan ratio sustained above 3% over a two-year period. The latter would also lead to a re-assessment of the bank's risk profile. A sharp slowdown in revenue growth in retail businesses or unexpectedly large deposit outflows that put pressure on group liquidity would also be rating negative.

### Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

An upgrade of the VR and Long-Term IDR would be likely to result from a better risk profile assessment. This would require the bank to sustain improvement in its risk appetite over a longer period, as would be likely to be reflected in greater asset-quality resilience and better earnings stability in more challenging economic conditions.

## Other Debt Ratings

Rating level	Rating
Senior preferred	BBB+/F2
Senior non-preferred	BBB
Subordinated	BB-

Source: Fitch Ratings

NIBC's long-term senior preferred debt is rated one notch above the Long-Term IDR. This reflects the protection that accrues to senior preferred debt from the bank's senior non-preferred and junior debt buffers. At end-2022, this buffer was 10% of NIBC's risk-weighted assets and we expect it to remain sustainably above this threshold. This also drives the equalisation of NIBC's long-term senior non-preferred debt with the bank's Long-Term IDR.

NIBC's 'F2' short-term senior preferred debt rating is the lower of two possible short-term ratings mapping to a 'BBB+' long-term rating, reflecting our assessment at 'bbb' of the bank's funding and liquidity score.

NIBC's legacy hybrid Tier 1 securities (ISIN code XS0249580357) are rated four notches below the bank's VR, reflecting the poor recovery prospects of these securities (two notches) and a high non-performance risk (two notches). Our assessment is based on the bank operating with a CET1 ratio comfortably above maximum distributable amount restriction points, which we expect to continue.

The Key Rating Driver (KRD) weightings used to determine the implied VR are shown as percentages at the top. In cases where the implied VR is adjusted upwards or downwards to arrive at the VR, the KRD associated with the adjustment reason is highlighted in red. The shaded areas indicate the benchmark-implied scores for each KRD.

**VR - Adjustments to Key Rating Drivers**

The asset quality score of 'bbb+' has been assigned below the 'a' category implied score due to the following adjustment reason: concentrations (negative).

The earnings & profitability score of 'bbb+' has been assigned below the 'a' category implied score due to the following adjustment reason: earnings stability (negative).

The capitalisation & leverage score of 'a-' has been assigned below the 'aa' category implied score due to the following adjustment reasons: risk profile and business model (negative), internal capital generation and growth (negative).

**Significant Changes**

**Weaker Economic Outlook but Resilient Environment for Banks**

Fitch expects Dutch GDP growth to weaken significantly to 1.1% in 2023 and 1.4% in 2024, following strong growth of 4.6% in 2022. The economic slowdown, driven by high inflation and rising interest rates, may reduce business and consumer confidence and erode households' real incomes. This would result in moderate pressure on banks' asset quality, mainly stemming from the most vulnerable SME and corporate borrowers.

However, Fitch believes this will not permanently damage the stable and well-developed Dutch economy and therefore should not impair Dutch banks' capacity to generate sound business volumes. The operating environment score (aa-/stable) reflects a tight labour market, high household savings and ample fiscal room, and we believe it has some headroom to absorb a weaker economic performance.

### Further Balance Sheet De-Risking

In March, NIBC announced that it was in advanced discussions to sell its CLO platform and investment franchise, NIBC Investment Partners, as part of its ongoing strategy to divest and reduce exposure to non-core activities. The potential sales would follow the disposals of oil and gas and leveraged finance portfolios in 2022 as the bank seeks to reduce exposure to cyclical industries. The bank expects that sales of the two portfolios would be relatively neutral for its 2023 income statement but would boost the bank's CET1 ratio by around 100bp due to lower RWAs. The bank aims to reduce its non-core exposures (end-2022: EUR3.8 billion; equivalent to around 17% of total assets) to below EUR2 billion by end-2023. Fitch views the reduction in exposure to non-core and cyclical industries as positive for NIBC's risk profile.

### Manageable Commercial Real Estate Exposure

Commercial real estate (CRE) lending (end-2022: EUR1.9 billion, equivalent to 10% of total loans) remains a core product for NIBC. The bank mainly lends to small residential real estate developers in the Netherlands and has appetite for sectors such as logistics and, to a lesser extent, retail space. Sharply rising interest rates will likely gradually drive up yield requirements and put pressure on CRE valuations, and tighter funding conditions may increase refinancing risk for CRE borrowers (including developers). However, despite generally declining property values in the retail and office segments since the pandemic, NIBC's non-performing CRE loans remained manageable at 3.2% at end-2022 (end-2021: 3.8%), due to the bank's satisfactory underwriting standards and a well-diversified book as a result of its focus on smaller ticket sizes.

### Satisfactory 2022 Results

Operating income fell 5% to EUR466 million in 2022 due to a normalisation of equity investment income to EUR39 million compared to EUR76 million in 2021, when the bank completed a large number of exits. Operating expenses rose 5% due to higher non-personnel costs related to investments in projects and IT. The operating profit/RWA ratio fell to 2.3% from 2.8% in 2021 as a result but was also partly affected by 7% growth in RWAs from higher risk-weights on mortgage loans, including as a result of the implementation of the Dutch National Bank's mortgage floor.

Loan impairment charges remained low at 16bp and included an additional management overlay of EUR3 million to reflect heightened risks caused by high inflation and rising interest rates. The impaired loans ratio improved to 1.2% by end-2022, from 1.8% at end-2021, primarily due to a reduction in impaired loans from non-core activities, including from portfolio sales. The non-core book remains the largest source of impaired loans. The impaired loan ratio in the mortgage book was stable at 0.6%.

The bank's CET1 ratio fell to 17.7% (end-2021: 19.0%), mostly due to the denominator effect from higher risk-weights on mortgage loans. Management has announced that it has lowered its CET1 medium-term objective to 13%, from 14%, because of its lower balance-sheet risk. Fitch expects the ratio to be maintained above 14% in the near term.

### Stable Funding and Liquidity

NIBC has a stable funding and liquidity profile, which we view as resilient in light of recent market developments affecting the banking sector. The bank's largest source of funds is retail savings collected online in the Netherlands, Germany and Belgium. Although sensitive to pricing, these savings have been stable over several years, which we expect to continue.

Wholesale funding mostly comprises senior unsecured and covered bonds, and maturities are well spread. Liquid assets (excluding retained securitisations and covered bonds) of about EUR2.7 billion at end-2022 (12% of total assets) mainly consisted of central bank deposits and comfortably covered 2023 maturities of EUR1.7 billion. The bank's liquidity coverage and net stable funding ratios were satisfactory at 206% and 135%, respectively, at end-2022.

### Change in Resolution Approach Does Not Alter Capital Stack Composition

In February, the Dutch national resolution authority informed NIBC of a change to its resolution approach, should the bank ever fail, which is for it to be wound up under normal national insolvency proceedings. Accordingly, the bank's minimum requirement for own funds and eligible liabilities (MREL) has been set at 11.7% of the total risk exposure amount - equivalent to the bank's total capital requirement. NIBC can comfortably meet this requirement solely with CET1 capital, removing its need to issue MREL-eligible debt as a result. However, the bank remains committed to durably maintain a combined buffer of senior non-preferred and junior debt at above 10% of RWAs.

Actual jurisdiction D-SIB GSR	ns
Government Support Rating	ns
Government ability to support D-SIBs	
Sovereign Rating	AAA/ Stable
Size of banking system	Negative
Structure of banking system	Negative
Sovereign financial flexibility (for rating level)	Neutral
Government propensity to support D-SIBs	
Resolution legislation	Negative
Support stance	Negative
Government propensity to support bank	
Systemic importance	Negative
Liability structure	Neutral
Ownership	Neutral

The colours indicate the weighting of each KRD in the assessment.

■ Higher influence
 ■ Moderate influence
 ■ Lower influence

The Government Support Rating of 'no support' reflects Fitch's view that senior creditors cannot rely on receiving full extraordinary support from the sovereign if NIBC becomes non-viable. This reflects the bank's lack of systemic importance in the Netherlands, and the implementation of the EU's Bank Recovery and Resolution Directive and the Single Resolution Mechanism. These provide a framework for resolving banks that is likely to require senior creditors to absorb losses, if necessary, instead or ahead of, a bank receiving sovereign support.

## Environmental, Social and Governance Considerations

### Overall ESG

### How relevant are E, S and G issues to the overall credit rating?

5	Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.
4	Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
3	Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
2	Irrelevant to the entity rating but relevant to the sector.
1	Irrelevant to the entity rating and irrelevant to the sector.

### Environmental (E)

General Issues	Score	Impact	Sector-Specific Issues	Reference
GHG Emissions & Air Quality	1		n.a.	n.a.
Energy Management	1		n.a.	n.a.
Water & Wastewater Management	1		n.a.	n.a.
Waste & Hazardous Materials Management; Ecological Impacts	1		n.a.	n.a.
Exposure to Environmental Impacts	2		Impact of extreme weather events on assets and/or operations and corresponding risk appetite & management; catastrophe risk; credit concentrations	Business Profile (incl. Management & governance); Risk Profile; Asset Quality

### Social (S)

General Issues	Score	Impact	Sector-Specific Issues	Reference
Human Rights, Community Relations, Access & Affordability	2		Services for underbanked and underserved communities; SME and community development programs; financial literacy programs	Business Profile (incl. Management & governance); Risk Profile
Customer Welfare - Fair Messaging, Privacy & Data Security	3		Compliance risks including fair lending practices, mis-selling, repossession/foreclosure practices, consumer data protection (data security)	Operating Environment; Business Profile (incl. Management & governance); Risk Profile
Labor Relations & Practices	2		Impact of labor negotiations, including board/employee compensation and composition	Business Profile (incl. Management & governance)
Employee Wellbeing	1		n.a.	n.a.
Exposure to Social Impacts	2		Shift in social or consumer preferences as a result of an institution's social positions, or social and/or political disapproval of core banking practices	Business Profile (incl. Management & governance); Financial Profile

### Governance (G)

General Issues	Score	Impact	Sector-Specific Issues	Reference
Management Strategy	3		Operational implementation of strategy	Business Profile (incl. Management & governance)
Governance Structure	3		Board independence and effectiveness; ownership concentration; protection of creditor/stakeholder rights; legal /compliance risks; business continuity; key person risk; related party transactions	Business Profile (incl. Management & governance); Earnings & Profitability; Capitalisation & Leverage
Group Structure	3		Organizational structure; appropriateness relative to business model; opacity; intra-group dynamics; ownership	Business Profile (incl. Management & governance)
Financial Transparency	3		Quality and frequency of financial reporting and auditing processes	Business Profile (incl. Management & governance)

Unless otherwise disclosed in this section, the highest level of ESG credit relevance is a score of '3'. This means ESG issues are credit neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. For more information on Fitch's ESG Relevance Scores, visit [www.fitchratings.com/esg](http://www.fitchratings.com/esg).

The ratings above were solicited and assigned or maintained at the request of the rated entity/issuer or a related third party. Any exceptions follow below.

#### DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: <https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
