# NIBC NACE SUPPLEMENT March 2021

## 2020 NACE Supplement

NIBC steers its business on its own internal sector classification and organization. Therefore industry sectors based on internal NIBC sector organisation are presented in the 2020 NIBC Bank Annual Report (Key Figures, p13).

Our corporate loan portfolio can be also mapped to the industry sectors of NACE classification. NACE ("Nomenclature statistique des Activités économiques dans la Communauté Européenne") is the industry standard classification system used in the European Union and is the European implementation of the UN ISIC (International Standard Industry Classification of all economic activities) classifications.

Together with our Annual Report, Pillar III, sustainability reports and other supplements, this NACE supplement supports NIBC's commitments as a member institution of the Dutch Banking Association (NVB) towards 2016 Protocol for Transparent Reporting of Lending ("Protocol transparante rapportage over kredietverlening") and NVB recommendations.

In this supplement, NIBC Bank's corporate loan portfolio is reported based on the NACE codes at as detailed a level as possible to provide increased transparency to our stakeholders. NIBC uses NACE 2.2 which has as many as four hierarchical levels. NIBC reports at each of these four levels.

In certain cases where the desired level of detail does not exist within Eurostat NACE, NIBC has added an additional fifth code level which we use internally. This in line with EU guidance in regard to national and/or sectoral standards in order to provide additional transparency for our stakeholders.

#### EU Green Taxonomy alignment

As an internal pilot, NIBC Bank calculated an estimate of the alignment of the corporate portfolio with the EU Green Taxonomy using EU Joint Research Committee (JRC) draft taxonomy alignment coefficients (TACs)<sup>1</sup>. This is one step among the actions which need to be taken to comply with Article 8 of the Taxonomy Regulation.

The EU JRC coefficients provide financial institutions a way of understanding the potential alignment with the sustainable economy, taking into account the EU Taxonomy and its technical Do No Significant Harm (DNSH) criteria in the absence of the availability of DNSH data directly from our corporate clients. These coefficients are publicly available on the JRC website.

The EU JRC has designated 122 NACEs as taxonomy aligned, of which 60 have been given TACs. As of yearend 2020, NIBC's corporate exposures are comprised of 132 NACE activities. Of these, TACs were available for 19. In cases where a TAC was not available, we have followed the precautionary principle and conservatively assumed a TAC of 0.

Based on this methodology, NIBC's corporate portfolio had a *Taxonomy Aligned Share* or *Green Asset Ratio (GAR)* of 4.04% at year end 2020. Only the objective of *Climate Change Mitigation* is considered in the coefficients used to calculate this initial GAR and in the Taxonomy-Aligned (TA) exposure figures reported below.

Please note that these corporate portfolio GAR and TA exposures are first estimates, unaudited, and may be later restated as improved methods are developed and additional data becomes available.

### NIBC Bank Corporate Loan portfolio as of 31 December 2020
